

How to Enable Original Audio on Zoom

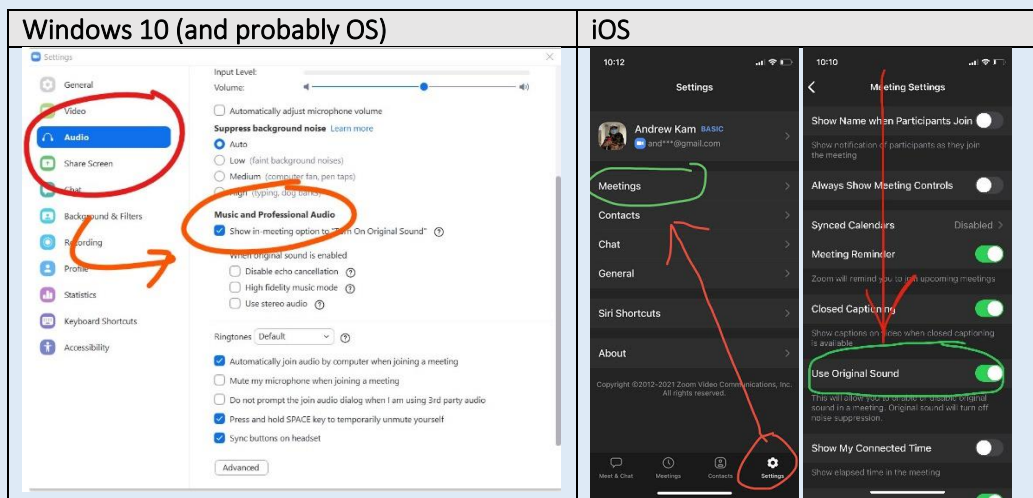

Desktop & Mobile Device

The default setting on Zoom is an audio *enhancer*. In music lessons, the audio enhancer filters out many sounds – including that of musical instruments.

Please change the default settings to allow “Original Audio”.

Step 1 (do this one time only, *before* your next meeting)

- Change the audio settings in the Zoom app before joining a meeting.

Step 2 (do this after you join a meeting; **you must do this every time**)

- Select 'Turn on Original Audio' in the upper left-hand corner
